Sawcross, Inc. Request for Information (RFI):

There are no disconnects shown on the drawings for any of the ten (10) motors on the Horizontal Rotor Aerators adjacent to the rotor mounts. Was this the basis of design or do they need to be included?

Please advise.

Engineer Response to Request for Information (RFI):

Todd Nestor with S&N discussed this request with Cogburn Bros while on site recently. Todd acknowledged to me that it was worth looking into the option of installing local disconnects based on the elevation of the orbal basin relative to the ground, where the control panel will be installed. Please submit a cost proposal to add ten (10) disconnects - one for each proposed aerator - on the existing walkway.
